

## Cut Score Ranges for Performance Levels

Performance level descriptors specify the level of performance on a test that is required for a student to be classified into a given performance level (such as proficient). The classification of students into ISASP performance categories is operationalized by establishing and applying a cut score on a test. Results from a standard setting study are used to help interpret performance of individual students as well as schools, districts and the state.

Two cut scores that define three levels of performance (Not-Yet-Proficient, Proficient and Advanced) have been established for the ISASP English Language Arts, Mathematics and Science tests. Cut score ranges for each grade are provided in Tables 1 to 3.

The Iowa State Board of Education approved the cut scores in September 2019. The cut scores will remain constant across years.
