

ISASP Reporting FAQs: 2020-2021

Question	Response
Reporting	
When will test results be reported?	OnDemand Reports (preliminary student level results) for the spring 2021 ISASP will first become available in late April 2021. After this date, OnDemand Reports for newly completed tests may take 2-3 weeks to be added, depending on the mode of administration.
How many questions must a student answer to receive a score?	Students who respond to one or more questions on a test will receive a score.
When should I mark an online test as complete?	Some students will have started a test (logged into a test and responded to questions) but will not be able to complete it (refusal, illness, moving out of state). Any such test started should be marked complete. Students still in Ready status in sessions at the end of the district's testing window will need to be removed from those sessions.
How is Do Not Report (DNR) used? Will my student receive an ISR if the test is marked DNR?	DNR should be utilized for a student tests that had started testing but should not have tested. Tests marked as DNR will not receive any score including an ISR.
How will the naming of test session impact the ability to view and sort student data when it is received?	The test session name will not limit the viewing or sorting of student results. However, the Class Name listed on the student registration will determine the grouping and sort order of the Student Roster. If no name is listed students will be sorted by grade and subject.
Can we get percentage by achievement levels for grade levels and/or cohort groups?	The Achievement Level Summary reports will provide the percentages of students in disaggregated categories.

<p>How can I access ISASP data and reports from previous administrations?</p>	<p>Spring 2019 data and reports will be available in PearsonAccess^{next}. Users can go to the Reporting Resources page of the ISASP Portal and click on the drop-down in 2019 Reporting Resources box.</p> <p>Users will need to log in to PearsonAccess^{next}, confirm their administration is set to 2018-2019 in the top-right of the page, and then select Reports > Published Reports.</p>
<p>Will ISASP from spring 2021 give more specific data on types of questions missed for science, math and ELA?</p>	<p>The ISASP spring 2021 reporting will not include item analysis reports. However, new for the 2021 Individual Student Reports are Writing Rubric Scores that show students' scores on each of the four writing elements based on their essays from the Writing section, as well as scores on items in each subject organized by the items' alignment to Depth of Knowledge (DOK).</p>
<p>Will the Writing Rubric Scores and DOK be provided as part of an imported data set (put in another system for ease of access for staff)?</p>	<p>The Writing Rubric Scores and DOK will be provided via the student data file.</p>
<p>Will we get school scores for Writing Rubric? Similar to what the individual students get?</p>	<p>The Individual Student Report will present the average district score for each of the four elements of Writing.</p>
<p>Will there be a growth chart for Science like ELA and Math?</p>	<p>Students in grades 5, 8, and 10 will be presented with Science scores earned. This year's grade 10 students will also have the scores they earned from the grade 8 Science test in 2019.</p>
<p>Will proficiency be adjusted due to statewide school closures from last spring?</p>	<p>The proficiency standards approved by the State Board of Education in 2019 will remain in effect moving forward, or until a change in the Iowa Core Standards occurs.</p>

<p>Will there be any information to judge whether or not a student has made a sufficient amount of growth?</p>	<p>The ISASP spring 2021 Individual Student Reports will feature growth charts. These charts display the range of scores included in each achievement level. The change in ranges reflects the increasing expectations of students in higher grades.</p> <p>Following the spring 2021 ISASP administration, student growth will best be monitored by comparing proficiency levels from the 2019 administration to 2021 performance. ISASP scores across multiple consecutive years will be needed to conduct an empirical study of growth and establish growth expectations. Policy-related considerations with respect to growth for accountability purposes will be evaluated and reviewed by the Iowa Department of Education.</p>
<p>Has there been any enhancements that would enable districts to share Individual Student Reports with families digitally?</p>	<p>Metadata with student identifiers have been added to ISR PDFs which allow some software to parse the ISRs into individual reports automatically. Users without this functionality can open an ISR PDF, select a student's ISR pages to print and then select "Save as PDF" to extract an individual student's report into a standalone file which can then be shared as the school sees fit.</p>
<p>How do parents access their student reports via the Parent Portal?</p>	<p>To access the Parent Portal, parents need first name, last name, DOB and claim code as listed in PearsonAccess^{next}. The claim code is located in the Student Data File via Published Reports in PearsonAccess^{next}.</p>
<p>Are there electronic reports available in a reporting system or are the reports all PDFs plus a single data file download?</p>	<p>OnDemand Reports for the spring 2021 ISASP will first become available in late April 2021.</p> <p>At the end of the testing window, when all ISASP tests have been scored and processed, PDFs of the final reports that include state-wide results will be made available for download as well as the district student data file.</p>
