### General Constructed Response Scoring Guidelines:

- Three to five sentences is considered an appropriate response length to adequately answer a constructed response. However, length does not count toward score. A response that satisfies the criteria for one or two points will earn that score, regardless of length.
- Spelling and grammar (including using complete sentences) do not count toward score. Responses, however, must be clear and understandable.
- Unless it contradicts the rest of the response, extraneous information will not reduce points earned.
